2003-09-25 Information theory and

inference, taught together in this exciting textbook, lie at the heart of many important areas of modern technology - communication, signal processing, data mining, machine learning, pattern recognition, computational neuroscience, bioinformatics and cryptography. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse-graph codes for error-correction. Inference techniques, including message-passing algorithms, Monte Carlo methods and variational approximations, are developed alongside applications to clustering, convolutional codes, independent component analysis, and neural networks. Uniquely, the book covers state-of-the-art error-correcting codes, including low-density-parity-check codes, turbo codes, and digital fountain codes - the twenty-first-century standards for satellite communications, disk drives, and data broadcast. Richly illustrated, filled with worked examples and over 400 exercises, some with detailed solutions, the book is ideal for self-learning, and for undergraduate or graduate courses. It also provides an unparalleled entry point for professionals in areas as diverse as computational biology,

financial engineering and machine learning. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse graph codes for error correction.

1993 While violations of human rights continue all over the world, Western criticisms and campaigns have too often presented them either in a Cold War context or with what some people in the South see as an anti-Third World bias. This not only undermines their political impact, but implies that the human rights record of Western societies is almost blameless. Jamil Salmi's significant contribution in this book is to develop a new conceptualisation of human rights violations. This goes beyond the Western liberal tradition and provides a broader classification, applicable to any society - be it capitalist or socialist, industrialised or Third World. Drawing on impeccably authoritative sources, including Amnesty International, this plain-speaking

and powerful argument illuminates not only cases of clear and direct violence, such as torture, but also forces our attention to situations where violence is disguised and indirect: the threat of environmental damage to human life, the repressive violence of racism and sexism, and the alienating and dehumanising effects of unemployment.-- BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. 1992 Sheila Delany's spirited translation of Osbern Bokenham's Legendys of Hooly Wummen (1443-1447) makes available in modern English the first all-female hagiography. Closely translated from elaborate, Latinate Middle English verse into fluent prose, A Legend of Holy Women contains the Augustinian friar's version of the stories of 13 women saints from gospel, apocrypha, martyrology, and high-medieval history. As Delany writes in her comprehensive introduction, Bokenham gives us not only an all-female hagiography--an authorial decision significant in its own right--but a gallery of powerful, articulate women who are indubitably worthy to do God's work. Some of them are well-educated, some give sound political advice to a monarch, some preach, converting hundreds and thousands to Christianity, some walk on water or perform resurrection. Nor are they pacifists; on the contrary, they call for

divinely inflicted vengeance and approve violence in their cause. Delany argues that Geoffrey Chaucer's Legend of Good Women provided a principle of selection and of arrangement for Bokenham's array of saints. She suggests further that the friar's choice of all-female hagiography, and his poetic representation of holy women, are closely linked to patronage and politics in fifteenth-century England. The translation is accompanied by full notes which, along with the introduction, make the book accessible to a wide audience. It will appeal to all readers interested in the representation of women in late-medieval culture as well as to scholars and students in medieval, renaissance, religious, and women's studies. 2005 The authors claim that, while information is a necessary precursor to knowledge, it is not sufficient in itself for improving business performance; pragmatic knowledge must be used to gain competitive advantage and is the result of individuals' developing a deeper understanding of how (and why) things work best in practice. The process of creating pragmatic knowledge transforms key lessons from systems thinking, total quality management, and organization learning into a powerful new business strategy. The authors draw on case

examples and a decade of original cross-cultural research about knowledge leadership. The book systematically outlines a user-friendly strategy for becoming a knowledge leader and for building high-performing, knowledge-based organizations. To help readers apply the concepts and tools in this book Cavaleri and Seivert draw on case examples and a decade of original cross cultural research about knowledge leadership

2019 Kiss My Genders celebrates the work of more than 20 international artists whose practices explore and engage with gender fluidity, as well as non-binary, trans and intersex identities. Featuring works from the late 1960s and early 1970s through to

the present, and focusing on artists who draw on their own experiences to create content and forms that challenge accepted or stable definitions of gender. Working across painting, immersive installations, sculpture, text, photography and film, many of these artists treat the body as a sculpture, and in doing so open up new possibilities for gender, beauty, and representations of the human form. This publication includes texts from writers, theorists, curators, poets and artists who have made key contributions to thinking in the field. From pop culture and gender dissidence to the embrace of the 'monstrous' or 'freaky', from the politics of prose to trans-feminism and politics on the street, each of these writers throws light on a different way of seeing. Also featured is a round-table discussion between a selection of artists and exhibition curator Vincent Honoré. In addition to these original texts, the book reprints a key text by Renate Lorenz and includes poetry by Travis Alabanza, Jay Bernard and Nat Raha. Published on the occasion of the exhibition, Kiss My Genders at Hayward Gallery, London (12 June - 8 September 2019).
