2003-09-25 Information theory and inference, taught together in this exciting textbook, lie at the heart of many important areas of modern technology - communication, signal processing, data mining, machine learning, pattern recognition, computational neuroscience, bioinformatics and cryptography. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse-graph codes for error-correction. Inference techniques, including message-passing algorithms, Monte Carlo methods and variational approximations, are developed alongside applications to clustering, convolutional codes, independent component analysis, and neural networks. Uniquely, the book covers state-of-the-art error-correcting codes, including low-density-parity-check codes, turbo codes, and digital fountain codes - the twenty-first-century standards for satellite communications, disk drives, and data broadcast. Richly illustrated, filled with worked examples and over 400 exercises, some with detailed solutions, the book is ideal for self-learning, and for undergraduate or graduate courses. It also provides an unparalleled entry point for professionals in areas as diverse as computational biology,

financial engineering and machine learning. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse graph codes for error correction.

2008-07-29 Tax amnesties remain as popular as ever as a tool for raising revenue and increasing tax compliance. International experience, however, shows that the costs of tax amnesty programs often exceed the programs' benefits. This paper weighs the advantages and disadvantages of tax amnesties, drawing on results from the theoretical literature, econometric evidence, and selected country and U.S. state case studies. The authors conclude that "successful" tax amnesties are the exception rather than the norm. Improvements in tax administration are the essential ingredient in addressing the main problems that tax amnesties seek to address. Indeed, the most successful amnesty programs rely on improving the tax administration's enforcement capacity. ?Given the potential drawbacks of tax amnesties, a few alternative measures are discussed. The authors conclude that successful tax amnesties are the exception rather than the norm. Improvements in tax administration are the essential ingredient in addressing the main problems that tax amnesties seek to address.

2020 How does social media affect working life in Higher Education? How are

universities harnessing its power to aid student learning? This innovative collection brings together academics and those working in professional services to examine these questions and more. The diverse and expert contributors analyse the many ways social media can be used to enhance teaching and learning, research, professional practice, leadership, networking and career development. The impact of social media is evaluated critically, with an eye both to the benefits and the problems of using these new forms of digital communication. This is the first volume to give such detailed attention to this area of high interest. Its innovative approach extends to its creation, with contributors found via their presence on Twitter. The short and impactful chapters are accessible while retaining an academic focus through their application of relevant learning theories and educational context. Social Media and Higher Education is essential reading for any professional working in higher education, including lecturers teaching education courses. It is also significant for researchers looking at more recent developments in the field and what it means to work in a modern higher education environment. The impact of social media is evaluated critically with an eye both to the benefits and the problems of using these new forms of digital communication. This is the first volume to give such detailed attention to this area of high interest.

1987 Nonfiction. Rumi is one of the great mystics of Islam. He founded in the XIIIth

century a brotherhood in the Turkish city of Konya, famous for the use of music in the context of spiritual experience. To understand Rumi is to enter the world of Islam in its true sense: known as a Sufi, Rumi is on par with the spiritual Masters of all great religious traditions. Written by Eva de Vitray-Meyerovitch, a French scholar who became a believer in Islam through her works on Sufism, this book is the best initiation not only to Rumi, but to Islamic thought: it is clear, elegant, scholarly, beautiful. It is an excellent tool for serious students of Islam as well as for the general public who wants to approach Islamic civilization with the respect and competence it requires. It should be on the program of any studies dealing with Islam, comparative studies of religions, the values and politics of the Islamic world. It is a key to the underlying world-view which it is impossible to understand without comprehending its spiritual roots. But this book is also about the life and writings of one of the great poets of the world. 2010-04-01 Memory of Trees is a multigenerational story of Gayla Marty's family farm near Rush City, Minnesota. Cleared from woodlands by her great-grandfather Jacob in the 1880s, the farm passed to her father, Gordon, and his brother, Gaylon. Hewing to a conservative

Swedish Baptist faith, the two brothers worked the farm, raising their families in side-by-side houses. As the years go by, the families grow—and slowly grow apart. Uncle Gaylon, more doctrinaire in his faith, rails against the permissiveness of Gayla's parents. Financial tensions arise as well when the farm economy weakens and none of the children is willing or able to take over. Gayla is encouraged to leave for college, international travel, and city life, but the farm remains essential to her sense of self, even after the family decides to sell the land. When Gaylon has an accident on a tractor, Gayla becomes driven to reconnect with him and to find out why she and her uncle—once so close but now estranged—were the only two members of the family who had resisted selling the land. Guided by vivid images of the farm's many beautiful trees, she pores over sacred and classical works as well as layers of her own memory to understand the forces that have transformed the American landscape and culture in the last half of the twentieth century. Beneath the belief in land as a giver of life and blessing, she discovers a powerful anxiety born of human uprootedness and loss. Movingly written, Memory of Trees will resonate for many with attachments to small towns or farms, whether they continue to work the land or, like so many, have left for a different life. Memory of Trees is a multigenerational story of Gayla Marty's family farm near Rush City Minnesota

2009-12-22 The dimensions of time and

space fundamentally cause and shape the variability of all human language. To reduce investigation of this insight to manageable proportions, researchers have traditionally concentrated on the "deepest" dialects. But it is increasingly apparent that, although most people still speak with a distinct regional coloring, the new mobility of speakers in recently industrialized and postindustrial societies and the efflorescence of communication technologies cannot be ignored. This has given rise to a reconsideration of the relationship between geographical place and cultural space, and the fundamental link between language and a spatially bounded territory. *Language and Space: An International Handbook of Linguistic Variation* seeks to take full account of these developments in a comprehensive, theoretically rich way. The introductory volume examines the concept of space and linguistic approaches to it, the structure and dynamics of language spaces, and relevant research methods. A second volume offers the first thorough exploration of the interplay between linguistic investigation and cartography, and subsequent volumes uniformly document the state of research into the spatial dimension of particular language groupings. Key features: comprehensive coverage of the field in terms of theory and methods the unique volume stands alone, since it neither is a handbook of dialectology or of areal linguistics, nor a handbook on language variation alone gathers together a great number of

distinguished scholars and experts in the field The introductory volume examines the concept of space and linguistic approaches to it the structure and dynamics of language spaces and relevant research methods

2013-10 From 1982 to 1986, an enterprising college student financed his education by selling over 600 sperm 'donations' to fertility clinics up and down the eastern seaboard. Twenty years later, Walt Callisto, who grew up as an only child on a rutabaga farm in upstate New York, suddenly discovers that he has 376 brothers and sisters. His search for his sperm daddy turns up a shady thoroughbred horse owner who stores frozen horse semen in his garage, traffics in hot boat motors, and maintains his Lincoln town car with parts appropriated from rental cars. Then Walt's life begins to get a little strange... From 1982 to 1986 an enterprising college student financed his education by selling over 600 sperm donations to fertility clinics up and down the eastern seaboard

2002 In October 1999, Abdurrahman Wahid, almost blind and recovering from a nearfatal stroke, was elected as Indonesia's fourth president. Referred to as 'Indonesia's surprising new president' by the Economist,

the man who had commanded the highest respect of his fellow countrymen for his lifetime devotion to public service, liberal democracy and tolerant Islam, was impeached in humiliating and controversial circumstances less than two years later. Wise to some, insolent to others, Abdurrahman's mercurial style of leadership constantly confounded critics and ultimately caused him to be widely misunderstood by both domestic and international observers. For the first time, biographer Greg Barton delves beneath the surface and gives us a unique insight into the man and his world drawn from his long relationship with Gus Dur - including being at his side during the final extraordinary months of the presidency. Those interested in the drama of modern Indonesian politics will find this book provides a fascinating and invaluable account of the enigmatic Gus Dur. 1988-01-01 Volume I of the thirty-eight volume translation of Ṭabarī's great History begins with the creation of the world and ends with the time of Noah and the Flood. It not only brings a vast amount of speculation about the early history of mankind into sharp Muslim focus, but it also synchronizes ancient Iranian ideas about the prehistory of mankind with those inspired by the Qur'an and the Bible. The volume is thus an excellent guide to the cosmological views of

many of Ṭabarī's contemporaries. The translator, Franz Rosenthal, one of the world's foremost scholars of Arabic, has also written an extensive introduction to the volume that presents all the facts known about Ṭabarī's personal and professional life. Professor Rosenthal's meticulous and original scholarship has yielded a valuable bibliography and chronology of Ṭabarī's writings, both those preserved in manuscript and those alluded to by other authors. The introduction and first volume of the translation of the History form a groundbreaking contribution to Islamic historiography in English and will prove to be an invaluable source of information for those who are interested in Middle Eastern history but are unable to read the basic works in Arabic. Volume I of the thirty eight volume translation of abar s great History begins with the creation of the world and ends with the time of Noah and the Flood

2011-01-01 The controversial assumption that underlies tax amnesties is that, at least in some situations, it is preferable to sacrifice the penalties for past non-compliance (and perhaps even the tax owing itself) in exchange for improved compliance in the future. Some commentators argue that tax amnesties actually undermine future compliance, because some taxpayers may be encouraged to engage in non-compliance in anticipation of future tax amnesty. Consequently, tax amnesties must be designed and implemented cautiously from a public policy

perspective. The scope of this highly relevant book is impressive. It covers the experience with tax amnesties of a variety of countries, deals with the constitutionality, morality, and economic effects of tax amnesties, and discusses the compatibility of tax amnesties with international agreements, in particular, the Treaty of the European Community. As the renowned international tax expert Brian Arnold L71 observes in the work's foreword: 'The book is an important contribution to the literature on tax amnesties, as there is no comparable source dealing with the topic . . . It is timely because the elimination of bank secrecy and the proliferation of Tax Information Exchange Agreements with tax havens have led several countries to adopt tax amnesty programs. Consequently tax amnesties must be designed and implemented cautiously from a public policy perspective The scope of this highly relevant book is impressive

2000-08 This thirteenth-century text by Nichiren extols the Lotus Sutra and critiques the other schools of Japanese Buddhism active at that time. Nichiren was arrested by the Kamakura government in 1271 and sentenced to exile on Sado Island. There he was in constant danger of assassination, and wrote the Kaimokusho to convince his remaining followers to follow his example in Buddhism. To do this, Nichiren criticized religions other than Buddhism, and then Buddhist sutras other than the Lotus Sutra. He asked the question Am I not the practitioner of the Lotus Sutra and answered

this question by quoting five testimonies to the truthfulness of his faith. He also identifies the three kinds of arrogant people and equates them with the three kinds of enemies of the Lotus Sutra. 2012-12-11 Irshad Manji's message of moral courage, with stories about contemporary reformers such as Martin Luther King, Jr., Gandhi, and Islam's own Gandhi, inspire and show the way to practicing faith without fear. Irshad addresses all people, Muslim and non-Muslim alike, in this universal message about the importance of independent thought and internal strength, of love, liberty, free speech, and the pursuit of happiness. Allah, Liberty, and Love is about creating choices beyond conforming or leaving the faith, which is what Manji hears from young Muslims who write to her in frustration,

whose emails, letters, and conversations are included in this book. Manji writes, I'll show struggling Muslims how to embrace a third option: reforming ourselves. And she recounts many affecting stories from young people who have contacted her for advice on how to step out of limiting views of Islam and the restrictions they put on life, love, family, and careers. Allah Liberty and Love is about creating choices beyond conforming or leaving the faith which is what Manji hears from young Muslims who write to her in frustration whose emails letters and conversations are included in this book

2010 When Fiona Collins meets Stuart Higgins at a leadership conference in Melbourne she isn't looking for a relationship, let alone the upheaval of falling in love with an intelligent, eco-friendly cotton farmer from south east Queensland. But that's exactly what's on the cards. When Stuart sends Fiona a pair of crusty old boots and a declaration of love 16 days into their fledgling relationship, it's the start of a love story that endures - in spite of distance, the strain of Stuart's cotton farm entering its fourth year of drought, and Fiona's issues with commitment. Something's got to give, and eventually Fiona makes the life-changing decision to move from her comfortable Sydney life to Stuart's farm where the

nearest township is Jandowae, population 700. Here, Fiona must become accustomed to snakes on the doorstep, frogs in the toilet, feral cats in the roof, and the perils of the bush telegraph. Gradually, she begins to love her life on the land and finds the courage to face her fears. But as Stuart struggles to balance environmental and commercial realities, she realises that farming isn't quite as simple as she first imagined. Ultimately, Fiona has to learn how to cope with the devastating impact of the drought that grips the countryside, and what it means for Stuart, the farm and their future together. Love in the Age of Drought is a delightful fish-out-of-water story about the city/rural culture clash overcome by the course of true love. Written with heart and humour, it's also a moving tribute to country Australia's strength and capacity for survival and renewal amid a drought that won't be broken. Ultimately Fiona has to learn how to cope with the devastating impact of the drought that grips the countryside and what it means for Stuart the farm and their future together Love in the Age of Drought is a delightful fish out of water
