2020-06-25 If you want to build an enterprise-quality application that uses natural language text but aren't sure where to begin or what tools to use, this practical guide will help get you started. Alex Thomas, principal data scientist at Wisecube, shows software engineers and data scientists how to build scalable natural language processing (NLP) applications using deep learning and the Apache Spark NLP library. Through concrete examples, practical and theoretical explanations, and hands-on exercises for using NLP on the Spark processing framework, this book teaches you everything from basic linguistics and writing systems to sentiment analysis and search engines. You'll also explore special concerns for developing text-based applications, such as

performance. In four sections, you'll learn NLP basics and building blocks before diving into application and system building: Basics: Understand the fundamentals of natural language processing, NLP on Apache Stark, and deep learning Building blocks: Learn techniques for building NLP applications—including tokenization, sentence segmentation, and named-entity recognition—and discover how and why they work Applications: Explore the design, development, and experimentation process for building your own NLP applications Building NLP systems: Consider options for productionizing and deploying NLP models, including which human languages to support 5688 5688 1s 224us step loss 3 1837 acc 0 1790 Epoch 2 300 5688 5688 0s 79us step loss 2 7894 acc 0 1834

2012-10-31 In this project Randall Bezanson examines judicial interpretations of free speech by means of a broad range of Supreme Court cases, arguing that over the past 15 years the Court has engaged in a truly revolutionary expansion of the reach of the free speech guarantee. The cases include the much-discussed Citizens United decision which granted the full measure of constitutional protection to speech by corporations; the Doe v. Reed case from Washington State that recognized the acts of signing petitions and voting in elections as acts of free speech; the Summum decision holding that the decision to select a monument for a public park and to reject another based on the government's disagreement with the monument's message is an act of government speech immunized from challenge by the First Amendment; and the Hurley and Dale cases that recognized free speech claims for messages and meanings that arose out of thin air: speech without an author (a parade); and an author without a message (the Boy Scouts). As in earlier books on freedom of the press and of religion, Bezanson aims to arm the reader with the capacity to reach her or his own decision about whether the Court's conduct befitted the independent judicial branch and the consequences of its decisions for a representative democracy--Provided by publisher. 5688 a piece of legislation that would come to be known as the Everything
